

13 February 2017

MANANGEMENT MEETING

13h00-16h00

Secretariat Offices, 4 Karen Street Bryanston

MANAGEMENT COMMITTEE AGENDA

Date: 13 February 2017 **Time:** 14:00 to 16:00 **Venue:** SAIPPA Offices, Bryanston

MEMBERS:

Mr Thomas Garner	Chairman	Exxaro Resources	To attend
Mr Andrew Carr	Member	Sebenzana Consulting	Tentative
Mr Dave Long	Member	Associate member	To attend
Mr Seelan Pillay	Member	Associate member	To confirm
Mr Ian Langridge	Member	Associate member	To confirm
Mr Wayne Glossop	Member	Wärtsilä South Africa	Apology
Mr Brian Day	Member	Clean Energy Africa	To attend
Mr Kheepe Moremi	Member	Sebenzana Consulting	To confirm
Mr Yousuf Haffejee	Member	Associate member	Apology
Mr Jean Venter	Corporate Secretary	Secretariat	To attend

1. WELCOME AND APOLOGIES

- 2. QUORUM PRESENT -fifty percent of the members plus one shall constitute a quorum.
- 3. READING AND CONFIRMATION OF THE AGENDA

4. COMPETITION ACT STATEMENT

The following competition law caution is to be read out at the start of each SAIPPA meeting. The competition law caution should also be recorded in the minutes of each meeting of SAIPPA. "Competition law caution:

In terms of SAIPPA's Constitution, SAIPPA members are required, at all times, to ensure that they are fully compliant with the Competition Act. In this regard, SAIPPA and its members will not engage in any discussion, activity or conduct that may contravene any provisions of the Competition Act. In particular, members shall not discuss, communicate or exchange any commercially sensitive information, including non-public information relating to prices, marketing and advertisement strategy, costs and revenues, trading terms and conditions, purchasing strategies, terms of supply, or distribution strategies. This applies not only to interactions in the context of formal SAIPPA meetings but also to discussions, communications or exchanges between members before, during or after SAIPPA meetings."

5. READING AND CONFIRMATION OF PREVIOUS MINUTES

Mr Jean Venter	Corporate Secretary	Secretariat	Present

1. WELCOME AND APOLOGIES

The chairman welcomed members present and **NOTED** the apologies above.

A quorum was present.

2. COMPETITION ACT NOTICE

Members **NOTED** the competition act cautionary notice tabled.

3. CONFIRMATION OF THE AGENDA

The agenda for the meeting was confirmed.

4. CONFIRMATION OF MINUTES

The minutes of the meeting that was held on 10 October 2016 were confirmed.

Secretaries: VdW& Co SAIPPA MANCOM Minutes 6 December 2016

5. IRP 2016

Members debated the recently released draft integrated resources plan from the Department of Energy. Members supported a view that the report in its current form was not particularly useful, noting that it is a 28-page document, a fraction of previous editions with little detail backing up its positions. Views that SA has surplus generation capacity and that delaying new generation may be in the interest of the economy, was noted. The respective SAIPPA workgroups were preparing comments on the draft IRP document and the chairman agreed to present these views at a public hearing later in December. The tight timelines as well as brief nature of the document created challenges in terms of providing quality input to the hearings. The meeting then workshopped the draft slides that was to be used in the presentation. The rationale for excluding certain energy generation modalities was not well described in the document, neither was the anti-nuclear position motivated. Members noted that SAIPPA was technology agnostic.

WHEELING CHARGES

Members advised that NERSA was making no progress with the wheeling charges framework despite promises from NERSA to complete the framework by December 2016. The matter has been on the table for about fifteen years. The wheeling charges framework of the Southern Africa Power Pool was said to be simpler and less expensive that those envisaged by NERSA.

AGREED

- a. To write to NERSA to request that the wheeling charges framework be expedited. (Mr Pillay)
- b. To communicate with the IPP office to schedule meetings for 2017. (Sec Gen)
- c. To draft an MOU between SAIPPA and the AMEU and SALGA. (Mr Venter)
- d. That workgroups generate an annual work-plan for tabling at the next ManCom. (Chairs)
- e. To meet with SALGA in January 2017. (Sec Gen)

ELECTION OF OFFICE-BEARERS

The chairman confirmed that he was not available for re-election as chairman, nor for the role of secretary general. The committee thanked Mr Njikelana for serving as chairman and acting secretary general over the past two years.

AGREED

- a. To appoint Mr Garner as chairman of the committee.
- b. That Mr Long will consider the option to serve as secretary general of the association.

Secretaries: VdW& Co

SAIPPA MANCOM Minutes 6 December 2016

	c. That the secretary forward documentation on the se	cretary general position to Mr Long. [Angela Davids, Dave Long]
	DATE OF THE NEXT MEETING	
	13 February 2017

SAIPPA MANCOM Minutes 6 December 2016

MEMORANDUM OF UNDERSTANDING

between the

SOUTH AFRICAN INDEPENDENT POWER PRODUCERS ASSOCIATION (SAIPPA) and the

ASSOCIATION OF MUNICIPAL ELECTRICITY UTILITIES (SOUTHERN AFRICA) (AMEU)

The parties to this agreement, (the associations) respectively represent constituencies in the independent power production industry and local government electricity distribution, in Southern Africa. The purpose of this agreement is to establish a level and modality of cooperation between these two associations.

The associations identify that local government is a key role-player in the deployment and regulation of small scale embedded generation in urban areas, while independent power producers are often the contracting parties for the supply of such embedded generation plant.

It is therefore agreed -

- a. That the associations will cooperate into the future with the ongoing development of regulations and financial frameworks to enable embedded electricity generation plant proliferation in urban areas.
- a. That SAIPPA will provide the AMEU with technical and financial advice on regulatory and financial arrangements inductive to the proliferation of small scale embedded generation in urban areas.
- b. That the AMEU will consult SAIPPA on regulatory and financial arrangements regarding embedded electricity generation, if and when such matters are under consideration.

It is further agreed -

- c. That SAIPPA will from time to time advise SALGA on the evolution of independent power production and small scale embedded systems, as that art and technology evolves in the regulatory domain internationally.
- d. That the AMEU is afforded a permanent seat on the management committee of SAIPPA, and SAIPPA reciprocally a seat on the AMEU technical committee.

This cooperation agreement shall	continue until ca	incelled in writing by either party.	
Thus signed on this	day of	2017 at

COAL IPP Program

Program Feedback January 2017 from:

RE: Comments on the "Coal Baseload IPP Procurement Program"

SAIPPA welcomes the Department of Energy publishing, releasing the procurement documentation and the evaluation and announcement of two preferred bidders under Bid Window 1. Thabametsi IPP (Led by Marubeni) and Khanyisa IPP (Led by Acwa Power) were announced as the preferred bidders under bid window 1.

Salient Features of Procurement Program

Coal Bid Window 1 closed 2 November 2015

Evaluation Criteria is 90% Price, 10% Economic development

R150,000.00/MW Bid Bond required

1'000 MW allocated to South Africa IPP Program & 600 MW allocated to crossborder coal (procurement process has not commenced)

Local RSA Equity & BEE minimum of 51% requirement

BEE Equity minimum of 31% requirement

Ceiling Price of Bid R820.00 MW/h

Carbon Tax is pass-through cost based on bid information (Emissions, etc)

40% local content in construction phase

50% local content in operating phase

Decommission Provision must be made during operating phase

Environmental Authorization must be obtained

Water Use License and Allocation done post preferred bidder

EPC experience outside of home market

Need a Cost Estimate Letter from Eskom for Grid Connection

Incentive payment for early Energy Before December 2020

Government support for Eskom Payment Obligation

Penalty for late commissioning PPA term is reduced by 7 day for every 1 day late in terms of contracted COD

Following Comments on the COAL Bid Window 1 and Focal Areas for 2017

1) Qualifying Criteria for bidding

- Onerous requirement for participating in Bid (almost fully developed project to participate, development cost for each project in access of R50 million rands)
- Requires full EIA and Environmental Authorization to participate
- Require fully funded bids
- 51% RSA Equity is onerous in sense of raising Equity and debt portion by RSA equity players
- Plant capacity at a maximum of 600MW is a concern, this maximum plant capacity could potentially impact projects that can bring economies of scale benefits, if an IPP can potentially do 1000MW plant why we capping the plant size to 600MW while Eskom Coal plant sizes on its new build is above 4000MW for each plant
- Above results in very few developer that are able to participate in bid program

2) Financing Mega Projects in South Africa

- Available Rand (ZAR) funding for Mega Projects is major concern (Limited ZAR funding institutions for coal)
- Lack of competition between ZAR funding institutions

3) BEE requirements & Social community empowerment

- 31% is welcomed but may be onerous (equity funding and debt funding) for smaller BEE entities, only certain major BEE players can participate
- Broad Based Empowerment should also be considered and potentially included as mandatory (at least 2.5 to 5%) in each project
- Community (within 50km radius of plant) Empowerment should also be considered (1-2.5% made mandatory)

4) Government Approvals, SOE Approvals, Permits and Authorizations

- These requirements can be streamed lined within Government Entities (Lack of alignment, some approvals can take up to 2 years to obtain)
- Being recognized as a Government Strategic (SIP Project) does not add any value to project and its fast tracking process
- SOE not aligned with government initiatives and have potential off delaying and even derailing government led initiatives
- Government may need to assist in unblocking delays faced in investment decisions for infrastructure projects.

FACTS SHEET Bid Window 1: Coal Procurement Programme

1. Introduction

The purpose of this Note is to provide a short overview of the Coal Baseload IPP Programme ("the Coal Programme"). The Coal Programme was launched in December 2014 as the first baseload programme which allows the private sector to participate in the generation of capacity and energy through the utilisation of coal resources.

2. Background

- 2.1. On 15 December 2014, the Department issued the Request for Qualification and Proposals for New Generation Capacity under the Coal Programme ("the RFP");
- 2.2. The Coal Programme has been designed to consist of separate Bid Submission Phases. The RFP provides that 1 000 (one thousand) MW are available for allocation to Preferred Bidders under the First Bid Submission Phase, which bids were received on 02 November 2015;
- 2.3. Each Project must have a Contracted Capacity of not more than 600 (six hundred) MW;
- 2.4. Bidders are required, amongst other things, to have a minimum South African Entity Participation of 51 %, black ownership of 30 % and a weighted B-BBEE Contributor Status Level of 5 in respect of the South African Based Shareholders,
- 2.5. The Minister of Energy sought and obtained exemption from various requirements of the PPPFA and its Regulations to enable the Department to: (i) set forward looking commitments for B-BBEE and job creation (Economic Development); (ii) set thresholds for some of the Economic Development elements; and (iii) enable the sub-contracting of the project activities by the Project Company to its contractors who may be entities that have a B-BBEE status level that is not the same or better than that of the Project Company (in particular, foreign companies that would bring special skills, expertise and investment in the Projects). The required exemption from the relevant provisions of the PPPFA and its Regulations was granted by the Minister of Finance on 16 February 2016, in respect of the First and the Second Bid Submission Phases of the Coal Programme.

2.6. Projects submitted in the First Bid Submission Phase must be capable of beginning commercial operation before the end of December 2021.

3. Transfer of Risk under the Coal IPP Programme to the Private sector and Other Noteworthy Aspects

As part of the design of the Coal Programme key risk areas were identified and through the Power Purchase Agreement transferred to IPPs without affording the ability to seek tariff adjustment.

- 3.1. The tariff that is payable by the Buyer will be fixed on signature of the PPA for the duration of the PPA, and will escalate only at the Consumer Price Index in respect of all components other than the Fuel Charge Rate, and with reference to a basket of indices which are determinable (currently CPI plus 1%), in respect of the Fuel Charge Rate;
- 3.2. The risks of capital cost overruns or delays during construction, and operating costs overruns, including for coal, limestone and water after commercial operation, accordingly lie with the Seller, and the Seller is not entitled to adjust the tariff for any such overruns or delays;
- 3.3. The Seller assumes an ongoing obligation to maintain the Facility to ensure efficiency and compliance with the declared capacity, and in the event that the Facility is not maintained resulting in unscheduled outages, significant penalties are levied under the PPA;
- 3.4. The Seller's recourse to the Buyer for compensation for changes in law and other unforeseeable conduct during construction and operation is limited;
- 3.5. The Seller has full responsibility for the suitability of the Project Site, to discharge all environmental obligations in relation to the Facility and the Project Site and to discharge all obligations to decommission the Facility at the end of its life, pursuant to and in accordance with the applicable Consents and Environmental Laws;
- 3.6. With regard to decommissioning, the Seller is required to create a Decommissioning Reserve Account, which is insolvency remote for an amount which is sufficient to provide for the costs of decommissioning of the Facility and environmental liabilities;
- 3.7. The Coal and Limestone Supply Agreement/s are entered into between the Seller and its Coal and Limestone Supplier/s, and the Buyer has no exposure to ongoing mine operating costs and any residual environmental risks that arise in the mining of Coal and Limestone;

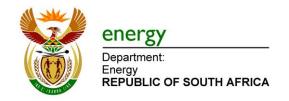

- 3.8. The Seller is only entitled to recover from the Buyer any Carbon Tax that is levied on it in respect of CO₂ emissions to the extent stated in the PPA. Sellers are not able to recover, as a pass through, any additional costs associated with Carbon Tax incurred for emissions in excess of the contractually agreed emissions stated in the PPA;
- 3.9. In addition to the above, the following pertinent issues are noteworthy in respect of the First Bid Submission Phase of the Coal Programme:
 - a) The two bids received are fully funded bids incorporating equity and debt sourced from a multiplicity of sources including the PIC, DBSA and IDC on favorable terms and conditions and debt funding tenors in excess of 18 years post COD;
 - b) One of the proposed Preferred Bidders is in close proximity to the Medupi power station as a mouth of mine project. For this Project a new mine will be developed resulting in the further creation of jobs in addition to those created specifically by the Project;
 - c) The Project to be undertaken by the proposed Preferred Bidder will provide further opportunity for the utilisation of the existing skills and industries developed as part of the construction of the nearby Eskom facilities;
 - d) In the case of one of the Projects, the utilisation of discard Coal is proposed thus resulting in the reduction of emissions emanating from discard coal dumps; and
 - e) The long term contractual arrangements dealing with the pricing and supply of Coal for the Projects presents a benchmark for similar arrangements in the industry.

4. Information In respect of the Recommended Preferred Bidders

Below we provide a summary of the pertinent information pertaining to the recommended Preferred Bidders.

4.1. The total Contracted Capacity of the recommended Preferred Bidders for the First Bid Submission Phase is 863.3 MW. The table below provides the breakdown of the proposed Contracted Capacity for each Preferred Bidder and the location of the respective Project.

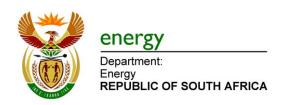

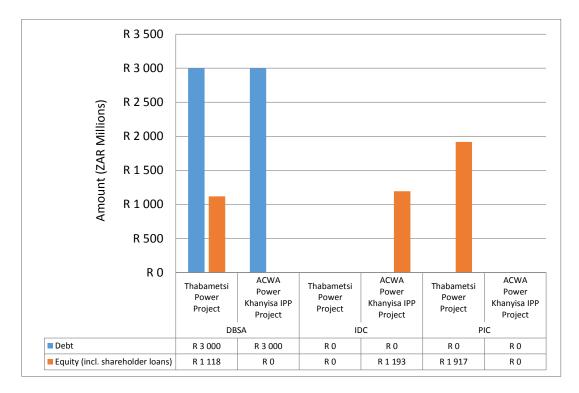

Project Name	Province	Proposed Contracted Capacity (MW)
Project 1	Limpopo	557.3 MW
Project 2	Mpumalanga	306.0MW

- 4.2. Project 1 has a proposed Scheduled COD of March 2021 and Project 2 has a proposed Scheduled COD of December 2019.
- 4.3. The table below provides a breakdown of the Qualification Price and Evaluation Price that have been proposed by the recommended Preferred Bidders. The Qualification price was set at R 820 MW/h, which is the cap. The Qualification Price is adjusted with the cost of grid connection and Carbon Tax to get the Evaluation Price. As is evident from the table below both the recommended Preferred Bidders submitted prices below the Qualification Price stipulated in the RFP.

Project Name	Qualification Price (R/MWh)	Evaluation Price (R/MWh)
Project 1	R 809.55	R 1 015.23
Project 2	R 797.06	R 1 018.06

4.4. The DBSA and the PIC have committed to providing BBBEE funding of R 1 118 million and R 575 million, respectively, to the BBBEE equity members of Project 1. The PIC also has direct equity exposure of R 1 342 million to the Project 1. The IDC has committed to providing R 1 193 million to the BBBEE equity members of the Project 2. The DBSA has debt exposure of R 6 000 million in total for the two recommended Preferred Bidders of the First Bid Submission Phase. The BBBEE equity members participating in each Bid Response also contributed approximately R 348 million towards the Equity Finance required for the respective Projects from their own resources. In total the DBSA, IDC and PIC exposure in the First Bid Submission Phase is R 10 229 million, which represents 25.3 % of the Total Project Cost for the recommended Preferred Bidders.

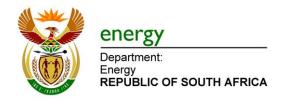

4.5. The table below provides a summary of the Total Project Costs indicating the debt and equity contributions including foreign equity.

	Total Funding* (ZAR Million)	Local Portion (ZAR Million)	Foreign Portion (ZAR Million)
Debt (incl. Mezz. Debt)	R 30 226	R 30 226	-
Equity	R 9 938	R 5 068	R 4 870
TOTAL	R 40 164	R 35 294	R 4 870

4.6. The table below provides a breakdown of the committed jobs for Citizens of South Africa during each of the Construction Period and the Operating Period for the recommended Preferred Bidders.

Project Name	Jobs (Citizens) during Construction	Jobs (Citizens) during Operations	Total
Project 1	5 163	9 183	14 346
Project 2	1 450	4 341	13 098
Total	6 613	13 524	27 444

4.7. The table below provides a breakdown of the jobs created per Province in respect of each of the Projects during both the Construction and Operating Periods for each Preferred Bidder.

Province	Jobs* during Construction Period	Jobs* during Operations Period	Total
Limpopo	5 163	9 183	14 346
Mpumalanga	1 450	4 341	13 098
TOTAL	6 613	13 524	27 444

Umfolozi Sugar Mill (Pty) Ltd	Corporate Membership - Large Company	31 500,00	Cancelled membership in Dec 2015, drought caused cutback in expenditure

SAIPPA **Business Plan 2017** February 2017

The 2015/16 surplus of the association was in the order of R188 000, with the eventual surplus for

2016/17 being of similar order of magnitude, and similar or slightly better than the budget of R185 000.

The reserves are likely to be around R400 000 by year-end. I suggest that we continue generation surpluses until we reach a safe number of around 1.5x the annual turnover, to ensure that the association can take on sudden expensive processes in future, such as an own convention or complex litigation. This would bring the reserves to around R1m.

In addition, for my own company I am requesting that the fee be raised from R12 000 to R13 000 per month, and the secretary general from R17 000 to R20 000.

The turnover for this year is likely to be around R660 000. The budget is similar for this coming year, but we need to think of practical ways to bring new members into the organisation. In my experience the most effective way is for members to invite guests from other companies to attend events. I suggest that members should be allowed to bring guests to meetings at no charge and that for each meeting we encourage members to dig into their own networks to invite widely.

Operationally, the six days per month that the secretary general is committed to give to the association should be sufficient, in my view, provided that the organisation limits its programme scope to its essential three objectives; that of local and regional access to the grid for IPPs and representing member interests in the regulatory environment.

I also recommend that the association enriches the member meetings with external contributors, bringing strategic views and intelligence to members that are not readily available in the public domain. Allowing the secretariat to widely invite from other associations can also help bring new faces and diversity to your meetings, as happened in the early days of the association.

An analysis of the 2016 member meetings indicated that very few members attended more than one meeting during the year. This is a risk factor for the association going forward and may have related to the format that was followed.

Jean Venter

Corporate Secretary
